

3. Develop a portfolio website for yourself by downloading a responsive template which gives details about yourself. Publish it in github.

The google Appscript code:

```
var sheetName = 'Sheet1'
var scriptProp = PropertiesService.getScriptProperties()

function intialSetup () {
  var activeSpreadsheet = SpreadsheetApp.getActiveSpreadsheet()
  scriptProp.setProperty('key', activeSpreadsheet.getId())
}

function doPost (e) {
  var lock = LockService.getScriptLock()
  lock.tryLock(10000)

  try {
    var doc = SpreadsheetApp.openById(scriptProp.getProperty('key'))
    var sheet = doc.getSheetByName(sheetName)

    var headers = sheet.getRange(1, 1, 1,
sheet.getLastColumn()).getValues()[0]
    var nextRow = sheet.getLastRow() + 1

    var newRow = headers.map(function(header) {
      return header === 'timestamp' ? new Date() : e.parameter[header]
    })

    sheet.getRange(nextRow, 1, 1, newRow.length).setValues([newRow])

    return ContentService
      .createTextOutput(JSON.stringify({ 'result': 'success', 'row': nextRow
}))
      .setMimeType(ContentService.MimeType.JSON)
  }

  catch (e) {
    return ContentService
      .createTextOutput(JSON.stringify({ 'result': 'error', 'error': e }))
      .setMimeType(ContentService.MimeType.JSON)
  }

  finally {
    lock.releaseLock()
  }
}
```

Script.js – form submission code

```
const scriptURL = " paste your GOOGLE APPSCRIPT DEPLOYMENT URL HERE";
const form = document.getElementById("myForm"); //make sure your form ID is
"myForm" in index.html

form.addEventListener("submit", (e) => {
  e.preventDefault();
  const formData = new FormData(form);

  fetch(scriptURL, { method: "POST", body: formData })
    .then((response) => {
      alert("Submitted Successfully!");
      form.reset(); // clear form after success
    })
    .catch((error) => {
      alert("Something went wrong. Please try again!");
      console.error("Error!", error.message);
    });
});
```
